

Heat exchangers and duct heaters are supplied with electrical control panels using Thyristor and PID thermoregulators for precision control.

Additional instrumentation for other thermal and non-thermal control requirements can be incorporated.

Commissioning and start-up services are provided upon request.

Features

Solutions with PLC are available.

Touch screen for controlling equipment.

Air conditioning system.

Connection interface with different communication protocols.

Product tested with:

- Noise test
- Harmonic analysis and interface test
