

Zoppas Industries

Heating Element Technologies

Company Profile

“We have a duty to pursue sustainability goals, acting responsibly, transparently and ethically, in order to deliver a better future to the next generations.”

Gianfranco Zoppas
Chairman

Zoppas Industries
Heating Element Technologies

Your global strategic partner

Who we are

With **over 60 years of experience** in the industry and a **global presence** boasting around 8000 employees and 12 production sites, **we play a pivotal role in various application areas** that permeate daily life.

What we do

We are a **strategic partner** to our customers in developing heating solutions, using our **extensive expertise and global production**, for domestic, commercial, and industrial needs.

Our purpose

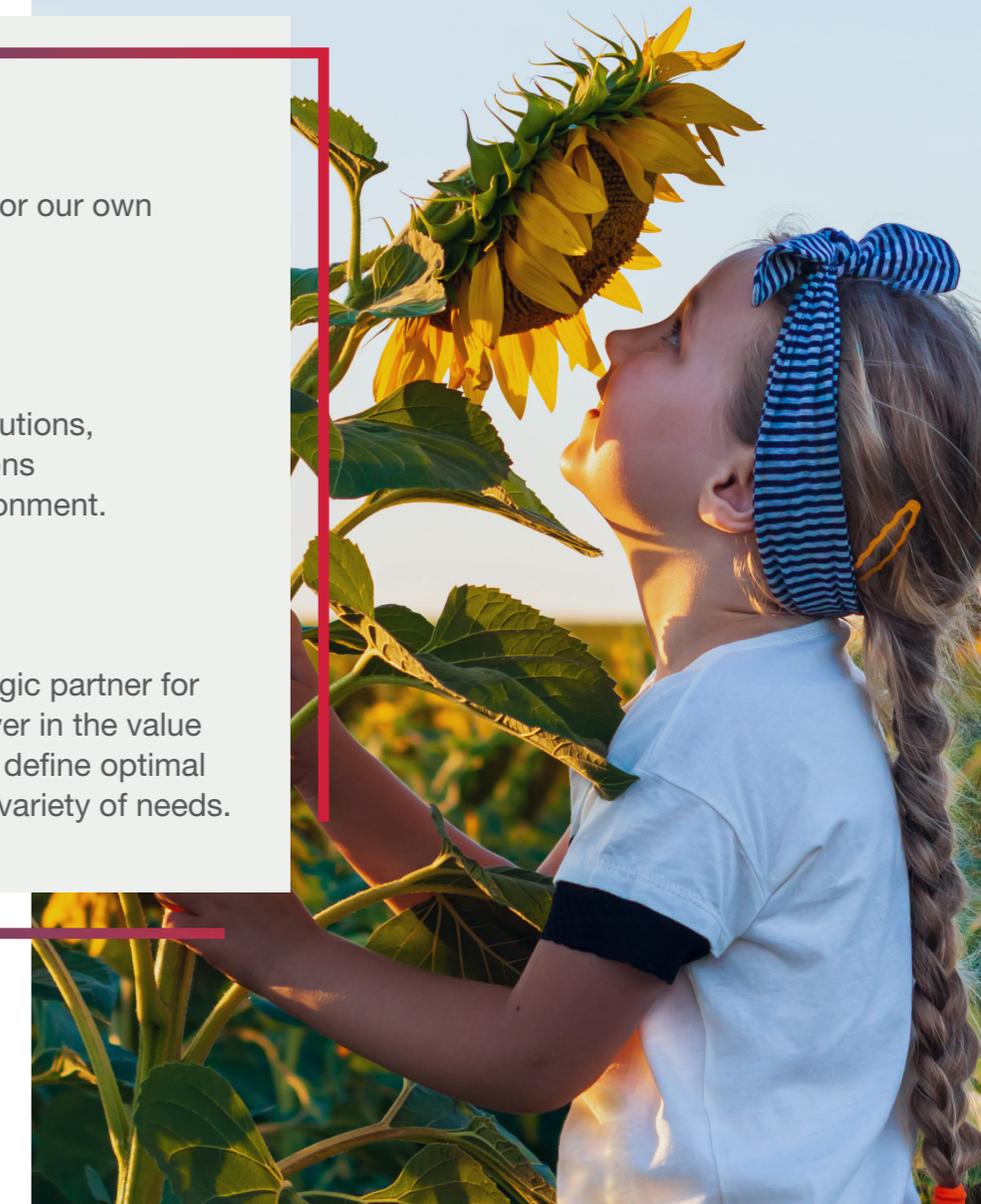

Improving the quality of life for our own and for future generations.

Our mission

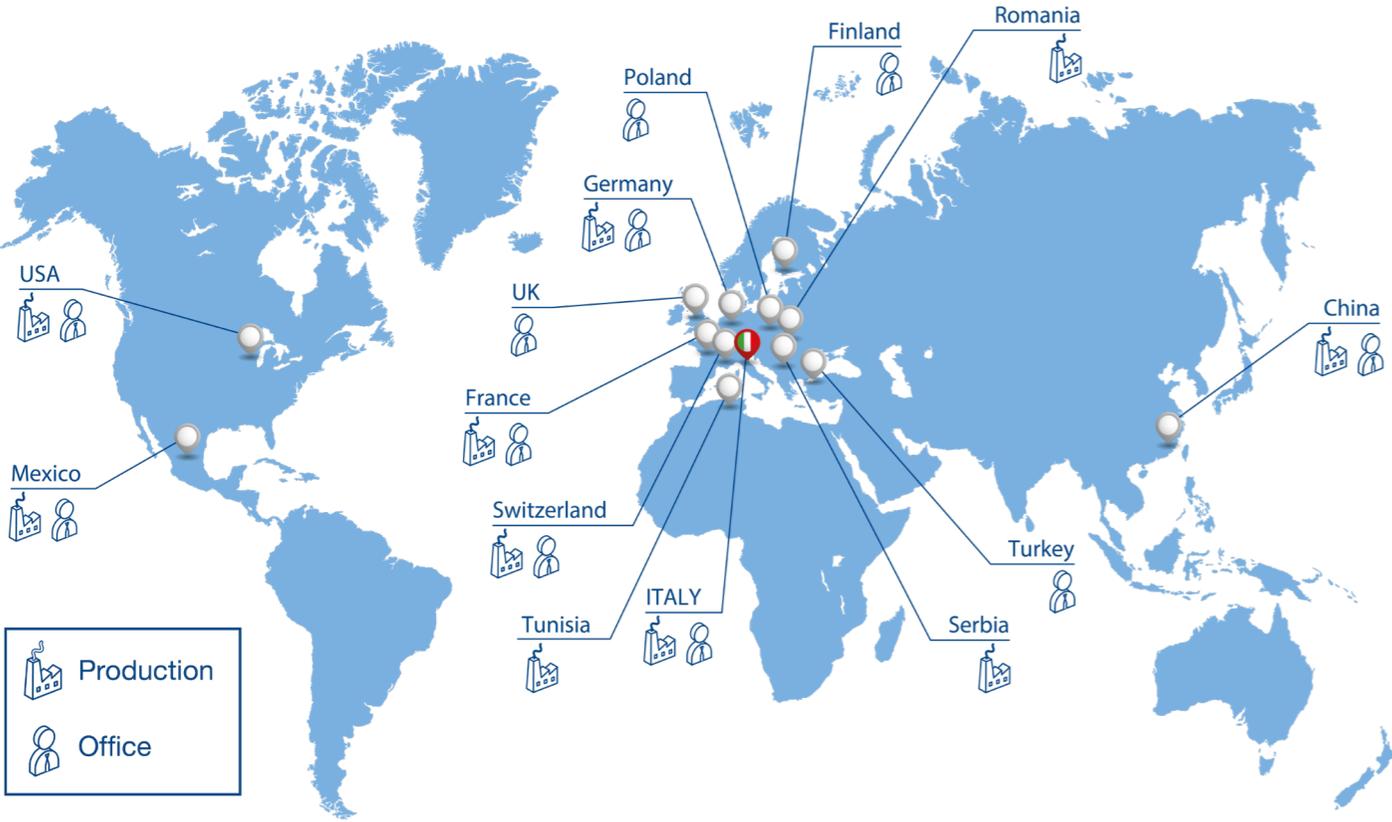

To provide smart heating solutions, contributing to the foundations for a sustainable living environment.

Our vision

To be recognised as a strategic partner for our clients and a critical player in the value chain, by helping our clients define optimal heating solutions for a wide variety of needs.

Zoppas Industries around the world

Zoppas Industries Heating Element Technologies (ZIHET) Headquarters are located in Vittorio Veneto (Treviso, Italy). **ZIHET is active in European, American, North African and Asian markets**, with subsidiaries and commercial offices in strategic countries. Main production plants are located to be close to main customers and sectors, in the USA, China, Tunisia, and Romania.

DISCLOSURE INSIGHT ACTION

ZIHET reduces **environmental impact** through actions on climate, water and resources, complying with EU regulations and **striving for a sustainable future.**

Our brand manifesto

Watch our
Brand Manifesto

Our story begins with **heat**. And the ambition to **control** it.

For 60 years, we've been applying **Italian expertise** to **smart heating solutions** for tomorrow.

We aim to decarbonise industry by managing and monitoring consumption in all sorts of sectors and we're constantly looking for new solutions with a **lower environmental impact**.

We work with the world's leading appliance manufacturers to find the perfect temperatures to **improve everyday life**.

All of this is possible thanks to our commitment to our partners, and by doing things the smart way.

Smart, because we embed **sustainability** into all our operations, Because we make ever more **integrated systems** to gather useful data, Because we create **high-value systems** to give heat all the technology it needs.

...and because, we know, we can create a **smarter tomorrow. Together.**
